

Protect Your Digital Assets

Protecting your business data is vital to keeping your organization productive and competitive. CBTS Backup-as-a-Service (BaaS) takes a holistic approach to addressing the entire spectrum of information backup and recovery concerns. It enables your business to eliminate capital expenditures and ongoing asset management with SLA-based services.

Solution Overview

An effective data backup solution offers four important components: speed, security, cost and your business' specific requirements. Based on these components, CBTS offers two flexible options: 1) a Virtual Edition for 100% virtual workloads, and 2) an Enterprise Edition for environments with both physical and virtual workloads.

Both editions include the following services:

Infrastructure

- Cloud Data Center
- Backup Software & Licensing
- Backup Infrastructure
- Backup Storage

Management

- Team of experienced data protection engineers, process and tools
- Capacity management
- Incident management
- Change management
- Routine configuration management

Customer Benefits

- 1. Protects your Digital Assets**
Ensures that your most valuable digital assets are kept safe.
- 2. Frees up your Internal IT Resources**
Frees up your IT team to focus on adding value to your organization, not running backups.
- 3. Preserves Capital**
Eliminates large capital expenditures (CAPEX) and allows customers to pay a single monthly fee (OPEX).
- 4. Flexible**
Utilize backup resources only as you need them, scale up/down at any time.
- 5. Reliable**
CBTS is known for our reliability. Our Enterprise Network Operations Center monitors and manages backups 24 x 7 x 365.
- 6. Secure**
All data is encrypted both in-flight and at-rest.
- 7. Industry-Leading Technology**
Our solution is based on industry-leading technology that is proven to work in almost any environment.
