

IP VPN is a Multiprotocol Label Switching (MPLS) powered service designed to handle your increasing traffic demands. With IP VPN you get a diverse network capable of handling even the most critical data.

Designed for High Performance

CBTS IP VPN Service provides the designation, routing, forwarding and switching of traffic flows across the wide area network. The service is ideal for small, mid-size, and enterprise customers that have a need to privately inter-connect their business locations in the U.S. and internationally. Simultaneous transmission of disparate data types (voice, video, priority data, etc.) is made possible through prioritization protocol stacks, which protect time sensitive applications operating in the business. Other features include:

- Flexible, scalable and enabling technology
- Reduced monthly recurring expenses for legacy dedicated circuits for each technology, realized by the convergence of voice, video, and data applications running across the IP VPN service
- Quality of service (QOS) from end to end
- Control of information flow

Customer Benefits

IP VPN is a very flexible and scalable technology that can improve customer WAN performance.

Additional benefits include:

- Virtual Private Networks without additional protocols
- Support across all Layer 2 services
- Not limited to just IP applications
- The Layer 3 platform provides privacy and security while allowing for growth and flexibility as the needs of the business become larger and more complex
- Packet prioritization and traffic shaping
- Router performance reporting

Why CBTS?

- **Exceptional Performance** - The IP VPN service enables customers to securely and efficiently transmit critical business data across a private IP network globally
- **Exceptional Peering** - The CBTS network has numerous inter-connects with top tier carriers and content distributors allowing for national and international scope
- **Exceptional Service** - CBTS is focused on medium, large and enterprise customers and has been the premiere service provider in the Greater Cincinnati market for more than 140 years.
