

Transform Your Storage Environment

CBTS Storage-as-a-Service (STaaS) is designed to offload your organization's financial and operational burdens. It enables your business to eliminate capital expenditures and ongoing asset management with SLA-based services, while offering flexibility to meet your needs.

Solution Overview

Our STaaS solution offers complete storage infrastructure and management in a utility service model. You pay a monthly bill for gigabytes installed and related managed services. This solution includes the following components:

Infrastructure

- Data center (Floor space, rack, power and cooling)
- Storage arrays
- Disk shelves
- SAN and Ethernet switches
- All in-rack cabling

Management

- 24x7x365 monitoring and management
- People, process and tools
- Capacity reporting and management
- Incident, change and routine configuration management
- Problem management
- Continuous improvements

Customer Benefits

- **Turn CAPEX into OPEX:**
The utility service model eliminates capital outlay and allows you to pay a monthly fee for only the storage used, along with management services.
- **Scale when your needs change:**
You don't have to pay upfront for future storage needs and can deploy capacity on demand.
- **Fast deployment:**
There is no operational impact while upgrading your storage infrastructure.
- **Fully managed:**
CBTS' highly trained storage engineers monitor and manage the environment 24x7x365, freeing your IT staff for other mission-critical projects.
