

Stay Connected Anytime, Anywhere

CBTS Voice and Video Solutions enable your organization to extend your corporate communications platform to mobile workers and implement a productive BYOD strategy. You can rely on these solutions to boost productivity, improve operational efficiency and connect employees and customers anytime, anywhere.

We provide a comprehensive portfolio of voice and video solutions by leveraging partnerships and expertise with all leading unified communications and collaboration manufacturers. Our highly certified solution architects will guide you through the entire process, from performance assessments to fully documenting the needs and requirements, to designing and implementing the solution.

Our solutions are based on industry-leading technologies, including:

Voice/VoIP

- Cisco Unified Communications Managers
- Cisco Business Edition 6000
- Cisco Unified Border Element
- Cisco Unified IP Phone Endpoints
- Avaya Aura® Communication Manager
- Avaya Aura® Contact Center

Video

- Cisco TelePresence Video Communication
- Cisco Unified Videoconferencing
- Avaya Radvision/Scopia Video Communication
